

Fanconi Anemia (FA) Pathway Expression across 26 Tissues (Log2 Scale)

Gene ● Fancd2 ● Fanci

Boxes represent Q1, Mean (middle solid bar), and Q3; whiskers extend to 1.5 * IQR. Points represent individual flight mice (n = 360).

Dashed lines connect tissue-level mean values for each gene. Values shown on log2 scale (YARN qsmooth). Genes: FANCD2 and FANCI (central ID complex essential for interstrand crosslink repair).
