

Double-strand break repair components across tissues

29 components across 26 tissues; rows ordered by tissue-level Spearman clustering

- Bone marrow
- Spleen-distal
- Cerebellum
- Eye
- Retina
- Heart
- Heart right ventricle
- Soleus
- Gastrocnemius
- Quadriceps femoris
- Tibialis anterior
- Extensor digitorum longus
- Kidney
- Left lobe of the liver
- Liver
- Optic nerve
- Lung
- Adrenal gland
- Mammary gland
- Thymus
- Spleen
- Cecum
- Colon
- Dorsal skin
- Femoral lateral skin
- Femoral skin

Left: average-linkage tree from tissue Spearman profiles. Centre: frozen YARN qsmooth log2 expression matrix. Right: tissue labels.
