

Base Excision Repair (BER) Expression across 26 Tissues (Linear Scale)

One-way ANOVA (across 26 tissues): Pathway $F(25, 334) = 32.44$, $P = 3.49 \times 10^{-74}$
Individual gene ANOVA: Ung ($P = 9.35 \times 10^{-66}$) | Ogg1 ($P = 4.46 \times 10^{-91}$) | Neil1 ($P = 1.21 \times 10^{-54}$)

Boxes represent Q1, Mean (middle solid bar), and Q3; whiskers extend to $1.5 \times \text{IQR}$. Points represent individual flight mice ($n = 360$).
Dashed lines connect tissue-level mean values for each gene. Values shown on linear scale ($2^{\log_2 - 1}$). Genes: UNG (uracil sensor), OGG1 (8-oxoG glycosylase), and NEIL1 (oxidized base repair).
