

Base Excision Repair (BER) Expression across 26 Tissues (Log2 Scale)

Gene ● Ung ● Ogg1 ● Neil1

Boxes represent Q1, Mean (middle solid bar), and Q3; whiskers extend to 1.5 \* IQR. Points represent individual flight mice (n = 360).  
Dashed lines connect tissue-level mean values for each gene. Values shown on log2 scale (YARN qsmooth). Genes: UNG (uracil sensor), OGG1 (8-oxoG glycosylase), and NEIL1 (oxidized base repair).
